

## DEPARTMENT OF THE NAVY

NAVAL BASE  
NORFOLK, VIRGINIA 23511-6002

IN REPLY REFER TO

5090  
Ser N42/ 0794  
JAN 04 1991

Mr. Edwin L. Rosenberg  
Manager, Division of Environmental Affairs  
403 City Hall Building  
Norfolk, VA 23501

Dear Mr. Rosenberg:

As discussed in a January 3, 1991 telephone conversation with Sharon Waligora of the Environmental Programs Department, Commander, Naval Base, Norfolk will host an Installation Restoration Program, Technical Review Committee (TRC) meeting on January 18, 1991. The meeting will be held at 9:00 a.m. in the Breezy Point Officer's Club. A Base map and a gate pass are enclosed to assist your entry.

The meeting will focus on five sites scheduled for remedial investigations during FY91: CD Area Landfill, Building LP-20, Q Area Drum Storage Yard, Camp Allen Landfill, and the Former PCB Transformer Storage Area near Building P-71. To provide you with background information for the meeting, a map of these sites and the work, sampling and analysis plans for each site are enclosed. We realize the reports are quite lengthy, so we have arranged for our contractors to summarize their reports during the TRC meeting.

If you require any additional information, please contact Ms. Sharon Waligora at (804) 444-3009. We look forward to meeting with you and appreciate your participation as a member of the TRC.

Sincerely,

*Cheryl F. Barnett*

CHERRYL F. BARNETT  
Director, Environmental Programs  
By direction of the Commander
