Re: Naval Base Norfolk **CD Landfill**, Permit No. 286

Dear Mr. Forsythe:

I conducted an inspection of the referenced facility on March 17, 1994, to observe the progress being made toward closure. During the inspection, I observed that adequate strides have been taken toward preparing the site for capping.

As discussed during our on site conversation, the Department does not object to the operators placing fences, light posts or shrubs on the landfill, provided the cap is not disturbed and the permeability is not compromised.

Should you have any questions regarding this, or any other waste management issue, please feel free to contact me at (804) 552-1251.

Sincerely,

A handwritten signature in black ink, appearing to read "T. L. Kowalski, Sr.", written over a horizontal line.

Thomas L. Kowalski
Environmental Inspector, Sr.
