**Re: Contract N62470-89-D-4814, Navy CLEAN, District III
Contract Task Order 0148
Final PA/SI Report (including Risk Assessment)
Camp Allen Salvage Yard, Naval Base, Norfolk, Virginia**

Dear Ms. Hauser:

Baker Environmental, Inc. (Baker) is pleased to submit five (5) copies of the Final Preliminary Assessment/Site Inspection Report (including Risk Assessment) for the Camp Allen Salvage Yard Site. The report has been amended with respect to comments received from the Navy Environmental Health Center (NEHC), LANTDIV, and NAVBASE.

Please note that because 11 months have passed since the Draft PA/SI was submitted for review, regulations in the area of risk assessment have changed and these have been reflected in the final version of the report. Based on comments from NEHC regarding the process by which chemicals of potential concern (COPCs) were selected, and current USEPA Region III Risk-Based (concentration RBC values), three COPCs, chromium, nickel, and zinc, have been eliminated and three other chemicals, 4,4-DDE, antimony and copper, have been added as COPCs. These modifications have not impacted the final risk assessment: no risk to site workers.

Copies of the Final PA/SI have been sent to the Naval Supply Center, Activity (Defense Reutilization and Marketing Services), and Naval Base Norfolk according to Attachment A of the contract.

A Total Quality Corporation

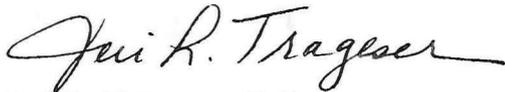

Baker
