Subj: INSTALLATION OF FENCING AT CAMP ALLEN INSTALLATION RESTORATION SITE

Ref: (a) Phoncon COMNAVBASE Norfolk S. Waligora/LANTNAVFACENCOM K. Walker
of 13 Aug 90.

1. As discussed in reference (a), we hereby request that funds for the subject project be forwarded to Public Works Center, Norfolk for Job Order Number 1370675, to install fencing at the Camp Allen Installation Restoration Site.

2. We originally planned to only post warning signs at the Camp Allen site; however, after discussion with COMNAVBASE, Norfolk officials, we have decided that fencing is the best way to preclude children from entering the pond in this area. Further, the fence will provide security for site assessment work which will commence later this year. Because we know that hazardous waste has been buried in this area, we are requesting concrete jersey barriers be used as the fence base to eliminate the need for any excavation. The top of the fence will consist of four feet of chain link fencing.

3. Point of contact for further information is Sharon Waligora at 444-3009.
