NOTICE OF THE NAVY'S INVITATION FOR PUBLIC COMMENT ON THE ENGINEERING EVALUATION/COST ANALYSIS FOR SOLID WASTE MANAGEMENT UNIT 14 NAVAL STATION NORFOLK NORFOLK, VIRGINIA

The Department of the Navy (DoN) invites public comment on the Engineering Evaluation/Cost Analysis (EE/CA) for the Solid Waste Management Unit (SWMU) 14, Q-50 Satellite Accumulation Area, which is collocated with and subsumes Installation Restoration Site 9, Q-Area Landfill. This area is associated with historical filling operations to expand the shoreline at Willoughby Bay, including construction debris landfill operations (Site 9), and temporary storage of hazardous and nonhazardous waste (SWMU 14) on a concrete pad. The EE/CA presents and evaluates alternatives for a non-time critical removal action (NTCRA) to mitigate potential unacceptable human health risk from exposure to contaminated surface soil, subsurface soil, and subsurface debris. In accordance with 40 CFR Section 300.415, an EE/CA is required when a NTCRA is planned for a site. The goals of an EE/CA are to identify the objectives of the removal action and to analyze the effectiveness, implementability, and cost of various alternatives that may satisfy these objectives. An EE/CA documents the removal action alternatives and selection process.

The EE/CA is based upon findings of previous site-related documents contained in the DoN's Administrative Record for NSN. The Administrative Record is located at:

Naval Facilities Engineering Command, Atlantic Division
