Mr. W. Gilley  
Division of Solid and  
Hazardous Waste Management  
Madison Building  
109 Government Street  
Richmond, Virginia 23219

Dear Mr. Gilley,

In an effort to identify environmental problems created by past waste disposal methods, the Navy Assessment and Control of Installation Pollutants program was established. As part of the program, an Initial Assessment Study was conducted at Naval Air Station Oceana. A copy of the study is enclosed for your information.

Six sites have been recommended for further action. They will be included in a Confirmation Study later this year.

If you have any questions concerning this study, please contact Mr. David Morton, 804-433-2226.

Sincerely,

B. K. McDANEL  
Captain, U. S. Navy  
Acting Commanding Officer

Enclosure:  
Initial Assessment Study
