Re: Additional Fieldwork at Sites 2E, 15, and 24 -
NAS Oceana

Dear Mr. Toth:

After our phone conversation on September 15, 1994, the second round of field activities for the above mentioned sites was performed. The data was reviewed and the Navy determined that minor additional field activities were required to enhance characterization at these sites. The attached enclosure provides a summary of these proposed activities. Completion should fully characterize these sites and complete the currently ongoing RCRA Facility Investigation (RFI) in preparation for the Corrective Measures Study (CMS). The fieldwork is scheduled to start February 21, 1995. This fieldwork is an extension of the previous fieldwork as submitted in the approved RFI Phase II workplan.

Also, per our phone conversation on February 16, 1995, I am enclosing four (4) copies of the signed certification for the POL Sites, six (6) copies of the certification for the CMS of Sites 1, 2B, and 2C in addition to the four (4) copies for the sampling addendum for the RFI of Sites 2E, 15, and 24.

Please call Mr. Jim Harris, RPM, NAS Oceana at (804) 322-4776 if you have questions or need additional information with regards to this submittal.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Harris".

J. F. HARRIS, P.E.
