Re: Naval Air Station Oceana, D Avenue Landfill Closure Plan

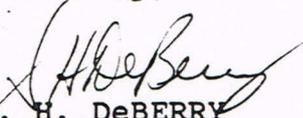

Dear Mr. Gulevich:

Enclosed, please find five copies of the closure and post closure plans for the subject project. The closure plan was prepared in accordance with the Solid Waste Management Regulations (VR 672-20-10) and Submission Instruction Number 6.

The closure plan consists of a bound narrative description of the closure and a separate set of drawings. As presented in the closure plan, waste placement in the landfill is expected to cease on or about 1 October 1991. The Navy will not proceed with the closure construction process until the Virginia Department of Waste Management has commented on the closure plan; therefore, expedient review of the closure plan is requested.

Should you have any questions or comments, our point of contact for this project is Mr. Jeff Chyzik, at (804) 433-2239.

Sincerely,

S. H. DeBERRY
Management Officer
By direction of the
Commanding Officer

Enclosures:

- (1) Landfill closure and post-closure plans
- (2) Landfill closure drawings
