Art:

I want to speak to Mac, Rob about the conference call, Comment #2 before I respond regarding EPA taking samples, just to be consistent with what's understood before now. I anticipate seamless procedure from here at any rate (will check w/them asap this am).

Its my recollection that David is good to go on SWMU 12 PP. I have held off getting on Div Dir calendar for this PP briefing (he likes these beforehand) until we had a reasonable time for FFA signing. I'm going to continue to cc Rope on these communications until he complains that he's not interested anymore...

SWMU 53

Mac / Patsy/

We are preparing a contract for Parris Island to remove the Waste Water Tank, remove soil at SWMU 35, remove debris at SWMU 53, and fix sinkholes at SWMU 3. There have been questions between about the number of samples required at SWMU 53. In the attached email we have minutes from a conference call in February discussing this issue. We finished with a vague "couple of samples". Rob said in the conference call that either the EPA or the Navy could collect sample after Tim removes the debris. Would it be ok (or better) to wait before we sample?

Tim,

It's your money so I don't want to take any actions you aren't comfortable with.

Let me know on Wednesday. We want to get our amendment out and have the contract proposals in by Aug 20.

Thanks, Art

---Patsy I spoke with Mark Sladic (Tetra Tech) this morning and he is ready for the SWMU 12 PP. Did we settle our issues with David on this one? I don't want to say anything until the FFA is out for good!
