Subject: Site 12 Areas 1, 4, and 5
Date: Wednesday, December 21, 2005 2:39:01 PM

Hi Art/Tim and others,

Confirmation came from EPA's contractor who made the site visit on Tuesday, December 20th, that Areas 1, 4, and 5 excavation appeared to be complete based on visual inspection. If post excavation sampling results come back which verify that cleanup goals have been met, it would be appropriate for you to proceed with backfilling these areas. EPA is o.k.with this, but make sure you check with DHEC also.

At the same time, it was reported that the Navy, MCRD and your contractor agreed with EPA that additional excavation and/or post excavation sampling was still needed at Areas 2, 6, and 3, as well as the causeway. Please keep us informed of your progress.

Additionally, we are still waiting for your RTC and revised RAWP Addendum. I thought we were to have a quick conference call with the team proceeding the RTC, to discuss your proposal for revegetation and to hear Priscilla's and/or Tom's input.

Thanks,
Lila
