Subject: EPA comment RE: Direct push work at MCRD PI
Date: Friday, February 10, 2006 3:58:26 PM
Importance: High

Hi folks,

For the sake of time, please accept this e-mail as EPA formal comment.

1) As reported, groundwater samples will be collected to verify the edge of contamination, or source area. The work plan does not address the data gap west of monitoring well PAI-45-MW19-SL. Please address this area.

Thanks,
Lila

Mark,

Attached are my comments to Jerry S. for the SWMU-45 Work Plan, as promised. Please contact me if you have any questions. The MWA referenced in my comments has already gone out under a separate cover, and to you electronically.

Don.

Hi everyone. As Art has mentioned previously, Navy has an opportunity to pursue a couple pilot test opportunities at MCRD Parris Island Site 45. In order to select and design the pilot tests, several additional groundwater samples must be collected from newly installed temporary wells. The attached is being sent out in hard copy today and should suffice as a letter style work plan, as requested by SCDHEC, and a monitoring well permit request. The current scope of work is the temporary well installation and sampling, and a couple soil samples, according to procedures from last year's Site 45 RI/RFI Addendum Work plan. We hope to complete this sampling during our next MCAS Beaufort field shift (13 Feb to 22 Feb)

Specific information about the actual pilot tests will be provided at a later date, once it is available. Thanks.
