Team,

RE:SOIL BORINGS APPROVAL MOTOR T BUILDING

I talked to the Project Manager for the motor T building , Bill Morris . There is a time factor that is associated with this project that I am not sure has been clearly emphasized. The soil boring have to be completed prior to the RFP being prepared, for award (Feb-March) . If this schedule can not be met , the MILCON funds are in danger of being lost.

If there is any other information that you require in review of the boring plan, please let me know directly. (904) 542-6409. The site location is establish for operational effectiveness. (Although it could be moved to a less effective location)

Also based on your review , if there are any location aspects that are prohibitive to USMC building, please advise as soon as possible. I am concerned that our normal review cycle and interaction could put USMC in a bind. Please give this review top priority.

I would like to have a conference call next week to establish any concerns you may have.
Please provide a time frame you will be available. (this will be based on you getting the information promised in the last meeting this week)

V/R
Charles Cook

Good Morning Everyone - I have not yet heard from Heber, but Tim will participate. Kelly has a conflict, but all others on this list are available. I have a favor to ask - Can we start at 10:30 instead - I've had something come up for 10:00 that I'd like to attend to. Thanks. MS

Subject: 10 December MCRD PI conference call

Hi everyone. At our last MCRD Parris Island Team meeting, we talked briefly about a conference call on the dates we previously had reserved

for our December meeting. I had conflicts with 12 December, and I think SCDHEC had conflicts with 11 December. Therefore, I believe we considered 10 December. I don't believe we have since confirmed this tentative date or discussed an agenda. Should the Team agree, we can discuss the following at 10 AM, 10 December. Please advise if you will be participating and we will confirm by email sometime before 10:00 whether we have critical mass to proceed. thanks.

- 1) site 45 path forward/alternatives evaluation status update
- 2) USGS Workplan in progress - discuss scope
- 3) site 27, vapor intrusion update
- 4) anything else

517 308 3572; code 6215594# is what we'll use if we proceed. thanks.
