SCDHEC was okay with the previous version of the RTCs, however, since revisions were made based on EPA comments, SCDHEC re-reviewed the RTCs. We have no additional comments.

If additional changes are made we will need to review the RTCs again.

Since Meredith will be back next week please be sure to copy her on any follow up emails.

Good morning again, everyone. We have one more small indulgence to ask. We made three very small (word) changes to RTC 11, one of which is repeated in RTC 24. SCDHEC blessed the RTC prior to these changes, but now the changes are necessary for EPA approval. I do not believe that the changes impact the intent of any of the previous EPA or SCDHEC statements, so hopefully we can now get concurrent approval from everyone.

We are again confirming at this time that we will be mobilizing to MCRD PI on Monday (26 October). Thanks to everyone for their continued patience and contributions towards finalizing this. MS

Good afternoon team

Since Meredith is out, Susan and I took a look at the redline version on the RTCs. The Department can concur on the RTCs as written and with the proposed language changes to be added to the SAP.

If any there are any changes made to this version of the RTCs the Department will need to review those changes before we can concur with the RTCs.

As Meredith mentioned in here email yesterday, the Department does not feel that the resolution of RTCs should affect the Navy going into the field to collect samples on Monday.
