1. Please note this approval is for current year milestones.
2. Based on team discussions and review of the SMP it appears that the Navy's desire is to close out Site 14. The Department feels that if the outfalls requiring further investigation listed in the Recommendations Section of the October 2012 Site 14 document are included with the appropriate Site/SWMUs in the SMP, this may be a way to keep track of the outfalls and close out Site 14. This should be a team discussion.
