Parris Island, SC 29905-9001

Dear Mr. Owens and Mr. Harrington:

The U.S. Environmental Protection Agency (EPA) has completed review of the Site 3 Draft Final Limited Pre-Design Investigation Work Plan, Marine Corps Recruit Depot, Parris Island, South Carolina (January 2014). The document may be considered satisfactory for its intended purpose. EPA's concern regarding intrusive activities into landfill waste remains. EPA expects survey results to be reviewed prior to drilling, to determine: 1) whether drilling is still necessary; and 2) where drilling locations can be best placed to minimize contact with landfill waste. EPA also expects that all waste generated from this investigation be properly managed, handled, contained, stored, sampled, and disposed based on what is known about the landfill contaminants and in accordance with all applicable regulations. Please provide an updated schedule at least two weeks in advance of field start so that oversight can be conducted. Please feel free to call with any questions you may have. I can be reached at 404-562-9969.

Sincerely,

A handwritten signature in black ink that reads "Lila Llamas".
