Norfolk, VA 23511-2699

**RE: Allegany Ballistics Laboratory
Electronic Document Submittal**

Dear Ms. Hayes:

The Office of Waste Management/ Superfund section (OWM/Superfund Section) has evaluated the Navy's request to implement an innovated system of electronic document submittal. The State as represented by the Division of Environmental Protection/Office of Waste Management/Superfund Section understands the Navy's clean contractor would develop an Internet web page with password protection. Draft documents would be placed on this web page for review. The reviewer could download the document for review or review the document on the web page and attach written comments.

Final documents would be submitted in written form and on a cd-rom for a trial basis. If the State and EPA agree after a short trial, all final documents will be submitted on cd-rom.

If there are any questions, or if you require further clarification, please contact me at (304) 558-2745 or email tbass@mail.dep.state.wv.us.

Sincerely,

Thomas L. Bass
Environmental Resource Specialist
Superfund Section
