Dear Ms. Hayes:

Phase II Aquifer Testing at Site 10 Review Comments

I have reviewed the Draft Report, Phase II Aquifer Testing at Site 10 at Allegany Ballistics Laboratory Superfund Site dated September 30, 1997. The review focused on the text and figures. Tables and Appendices received only a cursory look.

I have two requests. First, on page 2-1, paragraph 3, line 2, the date of the IAS was 1982, not 1992. Second, on Figure 2-2, Site 4A should either be labeled or the site outline deleted.

If you have any questions, please contact me.

Sincerely,

David A. McBride
Environmental Engineer
