RE: U.S. NAVY EFA NE - REMEDIAL ACTION CONTRACT (RAC)  
U.S. NAVY CONTRACT N62472-99-D-0032 - CONTRACT TASK ORDER NO. 0033  
NOMANS LAND ISLAND, CHILMARK, MASSACHUSETTS  
IMPLEMENTATION OF PHASE II A COMPREHENSIVE SITE ASSESSMENT  
SUPPLEMENTAL INVESTIGATION AND THE REQUIREMENTS OF THE  
CHILMARK CONSERVATION COMMISSION

Dear Mr. Steves:

This letter addresses the Chilmark Conservation Commission's (CONCOM) substantive requirements for implementing the Phase IIA Comprehensive Site Assessment Supplemental Investigation for Nomans Land Island. As discussed with Ms. Bea Atkinson during the week of August 17, 2001 and with Mr. Russel R. Walton on August 22, 2001, this letter is submitted in lieu of a Notice of Intent (NOI) or Determination of Applicability (DOA). Specifically, the project will have a limited affect on the island's resource areas, as described within the Massachusetts Wetlands Protection Act and as regulated under 310 CMR 10.00. The Technical Review Committee (TRC) meeting on September 6, 2001 has acted to serve public involvement interests on this project. During this meeting, Mr. Walton stated that the CONCOM had met recently and discussed the Phase II A work and found it not to require the filing of an NOI or a DOA. The Draft Scope of Work (SOW) describes all activities that are to be conducted in relation to the Phase II A event and in relation to the resource areas. The final SOW will be supplied to the CONCOM once it has been revised.

If you have any questions concerning this letter or the site, please feel free to contact me at 617-457-8246.

Sincerely,

Brian D. Corbett  
Nomans Land Island Field Operations Lead
