Draft Site Management Plan
Fiscal Years 2010 through 2014
St. Juliens Creek Annex
Chesapeake, Virginia

PREPARED FOR: Walt Bell, NAVFAC Mid-Atlantic
John Burchette, EPA Region III
Robert Stroud, EPA Region III
Karen Doran, VDEQ

PREPARED BY: CH2M HILL

DATE: August 4, 2009

Comments from VDEQ, provided 8 July 09.

1. **Comment:** Section 3.1.1, first sentence – change “Area UXO 0001 is” to “Area UXO 0001 includes”.

Response: The suggested change has been made.

2. **Comment:** Section 3.1.1, second paragraph, fourth sentence – change “the ordnance were” to “the ordnance was” or to “the ordnance items were”

Response: The sentence has been revised to read, “The ordnance items were not considered a hazard as long as the sediment was not disturbed”.

3. **Comment:** Table 3-1, Site 5, Comments – expand column to include missing text (Expanded RI)

Response: The suggested change has been made.

Comments from the USEPA, provided 22 June 09.

1. **Comment:** Risk management of groundwater at Site 5. Will further monitoring take place as part of the “risk managing”?

Response: The groundwater at Site 5 was risk managed with no further action; therefore, no additional monitoring of the groundwater will take place. Risk management of the Site 5 groundwater was documented in the following May 2007 consensus statement: “The team agrees to risk manage shallow groundwater at Site 5 with no further action based on the multiple lines of evidence derived from previous

discussions with technical support staff and summarized during the May 2007 partnering meeting.” The rationale for risk management was documented in an Addendum to the Expanded Remedial Investigation. The no further action decision for groundwater will be recorded in the upcoming Site 5 Record of Decision.
