Subject: 5 year review - additional VDEQ comments
Attachments: image001.jpg

Team -

Please see the following additional VDEQ comments on the 5 year review:

1. Please include data on the inorganic COCs previously sampled and phased out (i.e. cadmium, iron, lead, thallium) in the report.
2. Please include information on the success of the mitigation wetland at NNSY Site 9 in the report.
3. Since PAHs in soil are a site COC, please include an explanation of why they were not sampled as part of the 5 year review in the report.

Let me know if you have questions.
