Subject: comments - Draft ERI Site 2

Hi folks,

I have comments on one portion of the Draft ERI for Site 2. On page 7-1 in the middle of the Waste paragraph a sentence reads, "A petroleum odor was noted during trenching and monitoring well installation in the northern portion of the site." My comments are:

- a petroleum odor was noted in the following locations:
 - Appendix D - two soil boring logs MW-10S and 10D
 - Table 2-1 under the Description of Screened Lithology - MW-02S
 - Appendix I - trash delineation log DPT-1
- was this odor investigated further?
- was the source of this odor determined?
- are there further plans to investigate this odor?

I apologize if this has already been discussed. Even if the odor presents no threat, it might be helpful to include one or two additional statements giving an explanation of how the odor was dealt with. Everything else looks great!

Thank you!

Karen M. Doran
