 Subject: Site 5 RA WP - VDEQ comments

Team -

I have reviewed the referenced document and submit the following VDEQ comments:

Typographical Comments:

- * Page 2-1, second bullet - replace "bunt" with "burnt"
- * Page 2-1, third and fourth bullet - these bullets are missing periods
- * Page 3-1, Section 3.1.1 - last sentence is a duplicate of the fourth to last sentence
- * Page 3-8, Section 3.8.1 - second paragraph, second sentence - replace "One" with "Once"
- * Appendix E, Page 3, second to last sentence - Adjacent to what?
- * Appendix F, add page numbers

Technical Comments:

- * Page 3-8, Section 3.8.1, second paragraph and Appendix E, Page 3, last paragraph - it states that the excavation area will be backfilled with topsoil - is organic matter needed to support the wetland zone plantings?
- * Page 3-8, Section 3.8.1, second paragraph, last sentence - precautions should be taken to minimize compaction in the wetland planting zones, thereby increasing the chance of mitigation wetland success
- * Appendix E, Page 4, under the heading "Erosion and Sediment Control Measures", first sentence - erosion and sediment controls should be installed prior to all removal action activities, not during removal action activities - please correct in text
- * Appendix F, last page - the Mitigation Monitoring and Maintenance Plan should be developed and approved by the SJCA partnering team - please add this to text

Thank you for the opportunity to comment.
