SJCA Partnering Team.

EPA has completed its review of the subject document and has only the one following editorial comment to submit:

- Page 1, Introduction, 1st paragraph, 2nd sentence: Please make the following change, "Data gaps comprise four areas in the northern portion of the plume were where CVOCS were detected..."

Thank you for the opportunity to comment.

Feel free to contact me if you have any questions.

Subject  
SJCA Site 21 Work Plan

Hi everyone,  
The work plan for the additional delineation activities at Site 21 is attached. It is also posted on the document review section of our web site. You will NOT be receiving a

hard copy at this time; we plan to send out the hard copy final after we address any comments you might have. Let me know if this presents a problem for anyone.

As you guys know, we're hoping to get out in the field mid-February (scheduled Feb 19) to conduct this investigation in order to meet our team goals for the SSI report and treatability study work plan. I know this will be tough, but we talked about a one week review period in our last partnering meeting. Sorry! If at all possible, please provide comments by January 22.

(Josh...I see your question formulating... The Site 5 EE/CA is still the #1 priority so we can get it out for public review, but this work plan is a close second.)

Thanks!

Janna Staszak, P.E.
