Subject: Site 21 Final FS Comments

Janna,
Linda bought into what we had previously discussed. I'm going to send our final comments, but could we make one quick wording change?

Section 2.3 HHRA

However, the development and evaluation of remedies should take into consideration the potential for mobilizing naturally *occurring metals such as arsenic* and include monitoring to confirm that if increased, concentrations return to a level that does not pose unacceptable risk to potential receptors.

Please let me know if this is acceptable and I will send out our concurrence on the FS

Thanks

John Burchette(3HS11)
