Re: Draft Environmental Baseline Survey Phase II Quality Assurance Project Plan

Dear Mr. Smith:

The New Jersey Department of Environmental Protection (NJDEP) is in receipt of the Draft Environmental Baseline Survey Phase II Quality Assurance Project Plan dated May 8, 1996 (QAPP). Upon review of the subject report, NJDEP has a few comments.

1. The QAPP must incorporate the requirements of New Jersey's Technical Requirements of Site Remediation, N.J.A.C. 7:26E at seq. (Tech Regs), particularly Subchapter 2, Quality Assurance for Sampling and Laboratory Analysis. Although the QAPP referenced several of the appropriate guidance documents, it did not reference the Tech Regs. In addition NJDEP's Field Analysis Manual, July 1994 should be referenced and used.

2. In accordance with the Tech Regs, the laboratory shall be certified by NJDEP.

3. The QAPP did not specify the level of laboratory data deliverables. Reduced laboratory data deliverables are acceptable.

4. Section 6 - Field Decontamination Procedures
Field decontamination shall be in accordance with the May 1992 Field Sampling Procedures Manual.

If you have any questions regarding this letter, please do not hesitate to contact me at (609) 633-1494.

Sincerely,

Donna L. Gaffigan

Donna L. Gaffigan, Case Manager
