Contract Task Order (CTO) No. WE47

Subject: Submission of Draft Tier II Sampling and Analysis Plan for the West Ditch Area  
Groundwater Infiltration Investigation  
Former Naval Air Warfare Center Trenton  
Trenton, New Jersey

Dear Ms. Gaffigan:

On behalf of the Navy, enclosed are two (2) copies of the Draft Tier II Sampling and Analysis Plan (SAP) for the West Ditch Area Groundwater Infiltration Investigation at the Former Naval Air Warfare Center (NAWC) Trenton. The SAP is being submitted in accordance with the Navy's letter to NJDEP dated April 11, 2011 and details the additional investigation activities that the Navy is undertaking to identify and reduce the source of site-related contaminants of concern (COC) found in storm water at the site. For your review, we are enclosing the subject document in both paper and electronic formats.

The Navy has already completed the video survey of the West Ditch 36-inch corrugated metal pipe (CMP) and the results are summarized in Appendix A. The video inspection identified numerous leaking sections of the pipe. One focus of this SAP is to identify which sections are infiltrating contaminated groundwater and if any are infiltrating uncontaminated groundwater. These additional tasks will be implemented following NJDEP concurrence of the enclosed SAP.

Should you have any questions on the enclosed document, please contact Mr. Robert Lewandowski at (215) 897-4908 or Mr. Jeff Dale at (215) 897-4914.

Sincerely,

*Mary M. Mang*

Dear Ms. Gaffigan,  
 On behalf of the Navy, enclosed are two (2) copies of the Draft Tier II Sampling and Analysis Plan (SAP) for the West District Area Groundwater Investigation at the former Naval Air Warfare Center (NAWC) Trenton. The SAP is being submitted in accordance with the Navy's letter to NJDEP dated April 11, 2011 and details the additional investigation activities that the Navy is undertaking to identify and reduce the source of site-related contaminants of concern (COC) found in storm water at the site. For your review, we are enclosing the subject document in both paper and electronic formats.  
 The Navy has already completed the video survey of the West District 36-inch corrugated metal pipe (CMP) and the results are summarized in Appendix A. The video inspection identified numerous leaking sections of the pipe. One focus of the SAP is to identify which sections are leaking contaminated groundwater and to any and all existing unconsolidated groundwater. These additional tests will be implemented following NJDEP concurrence of the enclosed SAP.  
 Should you have any questions on the enclosed document, please contact Mr. Robert Lewandowski at (215) 897-4809 or Mr. Jeff Dale at (215) 897-4874.
