Contract Task Order (CTO) 0089, Modification 02
Draft Site Management Plan
Naval Weapons Station, Yorktown, Virginia

Dear Ms. Norton:

Attached is the Draft Site Management Plan for WPNSTA Yorktown for review and comment. This report covers the 16 sites presented in the Round One RI Report. This draft issue of the SMP does not yet address the 13 additional sites that are being proposed; however we do intend to include these. We request that you review the overall logic of this plan, in regard to sequencing of activities, durations, and deliverables. We will then revise the plan to incorporate your comments, and add the 13 new sites. However, we know very little about these sites, so the schedules for projected activities will be very tentative. Before we include these sites, we will need information regarding the environmental scope and strategy for these sites, in order to have a better basis for developing the schedules. We would also like to know if you consider any of these sites to be of higher priority than the others.

The schedules and associated duration tables have been produced using the Primavera Systems Scheduling Program. This program has proved useful for incorporating the logic with the schedules. The detailed schedule logic is also included in this report for your review. In the next draft, the scheduling will be converted to MSProject.
