Dear Ms. Bradford:

RE: FINAL CONTRACTOR'S CLOSE-OUT REPORT FOR PCB REMOVAL ACTION AT NAVY IR
SITE 1 - PRIVET ROAD COMPOUND; NAVAL AIR STATION JOINT RESERVE BASE
(NASJRB) WILLOW GROVE, PA

Enclosed is the Navy's Final Report regarding the PCB Removal Action that was implemented during the summer of 1999. This Report of Results outlines the steps that were taken to excavate PCB-contaminated soils at the Navy's IR Site 1 - Privet Road Compound. This report also details the results of confirmation sampling conducted subsequent to the excavation to confirm that the remedial action levels, outlined in the Navy's Final Workplan for PCB Removal, dated May 1999, were met.

The Navy's Draft Phase II RI Report for Site 1, dated April 1998, concluded that for site soils, PCBs were the only chemical of concern. Given that this removal action has successfully removed PCBs in site soils to concentrations that are below 1 ppm, the Navy believes that no additional actions for soils at IR Site 1 are required.

If you have any questions regarding the enclosed document, please give me a call at (610) 595-0567, extension 163.

Sincerely,

JAMES L. COLTER
Remedial Project Manager
by direction of the
Commanding Officer
