Mrs. Brenda Norton
Naval Facilities Engineering Command
1510 Gilbert Street (Bldg. N-26)
Norfolk, Virginia 23511-2699

Dear Mrs. Norton:

As a member of the Chesapeake Bay Foundation (York Chapter) I have attended most of the meetings, and have reviewed the reports by Baker Environmental concerning the old waste dump sites at the Yorktown Naval Weapons Station.

It was a pleasure to see the Navy's concern and the thorough study of Baker Environmental, Inc. in determining the nature and extent of the problem.

Now that this extensive study is nearly finished we note that several sites are scheduled for "removal activities." In respect to this aspect, we have several questions which you might answer:

- 1) Where will the materials "removed" be transported to, and;
- 2) What facilities exist at these new locations for treating these materials?

We fully recognize and approve of the Navy's efforts to remedy the problem and hope you will be able to answer our questions.

Sincerely,
Dexter S. Haven
Member, Chesapeake Bay
Foundation, York Chapter

Dexter S. Haven
