Subject: FW: NWSY: Site 31 Revised SAP - DEQ Comments

Hi Wade,

Thank you for reviewing and providing the comment below for the Draft Revised SAP for Site 31 at NWSY. The proposed change has been accepted and the following change has been made to the Executive Summary text:

The word "pinpoint" has been removed from the sentence "Pinpoint and characterize the source area." The sentence is now "Characterize the source area ."

Please let me know if you have any questions or concerns.

Thank you!

Kristin

Subject: NWSY: Site 31 Revised SAP - DEQ Comments

Thank you for giving the DEQ the opportunity to comment on the July 2012 Draft Revised SAP for Site 31 at NWSY.

The Draft Revised SAP was received by the DEQ on July 25, 2012.

The only revision the DEQ would suggest is changing the word "Pinpoint" on page 6 in the Executive Summary Update to a more broader term as I am not sure that limited sampling can definitively pinpoint source area contamination.

Upon your acceptance of the proposed changes and upon your submittal of the requested revisions, the DEQ will issue an official letter for your files.

Please let me know if you have any questions.

Sincerely

Wade M. Smith
