GLOSSARY

ABB-ES ABB Environmental Services, Inc.
AST aboveground storage tank

EBS Environmental Baseline Survey

02483

1.0 SITE DESCRIPTION

This Base Realignment and Closure Phase II Sampling and Analysis Outline briefly describes and proposes a plan for assessment of Building 602 at Naval Air Station Cecil Field. Building 602 is located on the north side of Main Road, between Guard House Post Number 1 and Yellow Water Weapons Compound (Figure 1). The facility is referred to as a supply building in the Environmental Baseline Survey (EBS) Report (ABB Environmental Services, Inc. [ABB-ES], 1994).

2.0 ENVIRONMENTAL BASELINE SURVEY COLOR DESIGNATION

Building 602 was color coded White in the EBS Report. However, a 200-gallon fuel oil aboveground storage tank (AST) was observed during an ABB-ES site reconnaissance walkover in August 1995. Therefore, the correct color code for the facility is Grey. The AST is located near the northeast corner of the building. No visible indications of fuel leakage were noted during the EBS or subsequent site walkovers.

3.0 RECOMMENDATIONS

No Phase II sampling or analysis is recommended for this facility. Potential environmental concerns associated with the fuel oil AST will be addressed separately by the Tank Management Plan.

A recommendation to reclassify the color code for Building 602 is pending a satisfactory resolution of AST-related issues.
