GLOSSARY OF TERMS AND ABBREVIATIONS

ABB-ES	ABB Environmental Services, Inc.
BRAC	Base Realignment and Closure
EBS	Environmental Baseline Survey
NAS	Naval Air Station
PCB	polychlorinated biphenyl
ppm	parts per million
UST	underground storage tank

1.0 SITE DESCRIPTION

This Base Realignment and Closure (BRAC) Program Phase II Sampling and Analysis Outline briefly describes and proposes a recommendation for Building 800 located at D Avenue and 6th Street (Figure 1) at Naval Air Station (NAS) Cecil Field. It is referenced in the Environmental Baseline Survey (EBS) (ABB Environmental Services, Inc. [ABB-ES], 1994a) as the Memorial Chapel.

Building 800 has a 1,000-gallon underground storage tank (UST) storing diesel fuel for heating purposes. A transformer is located at the west side of the building and contains less than 50 parts per million (ppm) of polychlorinated biphenyls (PCBs).

2.0 ENVIRONMENTAL BASELINE SURVEY COLOR DESIGNATION

Building 800 was color-coded Grey during the EBS because of the presence of the UST. On a site walkover in March of 1995, the transformer at the building was in good condition and show no sign of current or former leakage.

3.0 RECOMMENDATIONS

Recommend that the color code for Building 800 be redesignated Blue pending resolution of the UST issues.
