GLOSSARY OF TERMS AND ABBREVIATIONS

ABB-ES	ABB Environmental Services, Inc.
BRAC	Base Realignment and Closure
EBS	Environmental Baseline Survey
NAS	Naval Air Station

1.0 SITE DESCRIPTION

This Base Realignment and Closure (BRAC) Program Phase II Sampling and Analysis Outline briefly describes and proposes a recommendation for Building 952 located off of A Avenue (Figure 1) at Naval Air Station (NAS) Cecil Field. It is referenced in the Environmental Baseline Survey (EBS) (ABB Environmental Services, Inc. [ABB-ES], 1994a) as the Bath House.

Building 952 is a part of Seymour Park. The facility is divided into two parts: a dressing room for women and a dressing room for men. In addition, Building 952 encompasses property north and east of the building, which now contains a sand volleyball court and a children's play area. A swimming pool and pump house (former Building 951) were once located in the area surrounding Building 952.

2.0 ENVIRONMENTAL BASELINE SURVEY COLOR DESIGNATION

Building 952 was color-coded Grey during the EBS because of the presence of friable asbestos in the building. The EBS noted that canisters of chlorine gas had been stored in the former pump house (Building 951). During a site walkover in March 1995, no environmental concerns were noted for the bath house and the surrounding areas.

3.0 RECOMMENDATIONS

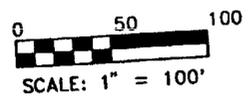

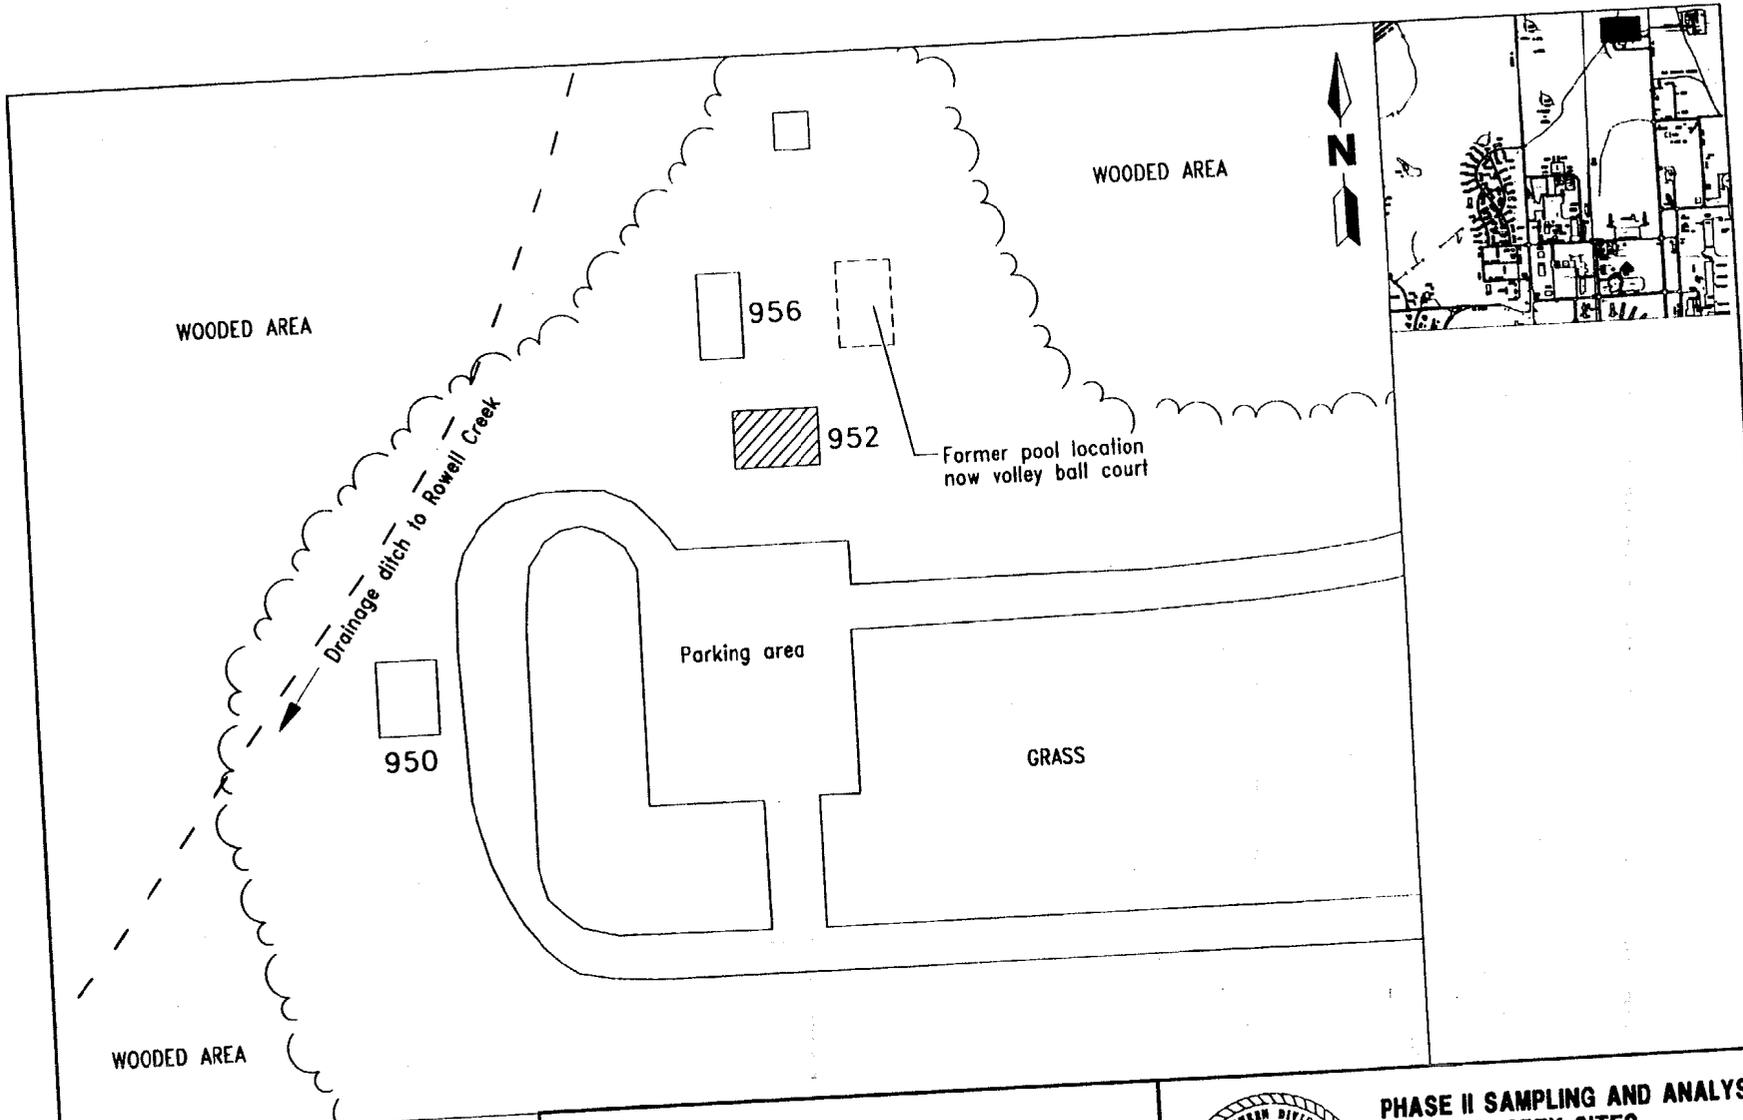

Recommend that the color code for Building 952 be redesignated to Blue pending resolution of the asbestos issues.
