GLOSSARY

ABB-ES ABB Environmental Services, Inc.
BRAC Base Realignment and Closure
EBS Environmental Baseline Survey
NAS Naval Air Station
SAO Sampling and Analysis Outline
UST underground storage tank

1.0 SITE DESCRIPTION

This Base Realignment and Closure (BRAC) Program Phase II Sampling and Analysis Outline (SAO) briefly describes and proposes a plan for assessment of Building 68B at Naval Air Station (NAS) Cecil Field. The facility is located on the southwest corner of the intersection of 3rd Street and D Avenue (Figure 1).

Building 68B is an office building for the adjacent supply departments located in Buildings 68 and 68A. Nonhazardous items are stored in this building.

2.0 ENVIRONMENTAL BASELINE SURVEY COLOR DESIGNATION

Building 68B was color-coded Grey in the Environmental Baseline Survey (EBS) because of the possibility of leakage from the diesel fuel underground storage tank (UST) located at Building 68A and the presence of friable asbestos. No other environmental concerns were noted.

3.0 RECOMMENDATIONS

No Phase II assessment sampling is recommended for this facility. Potential environmental issues relating to asbestos-containing materials (ACM) will be addressed separately. UST issues associated with the adjacent Building 68A will be evaluated with that facility.

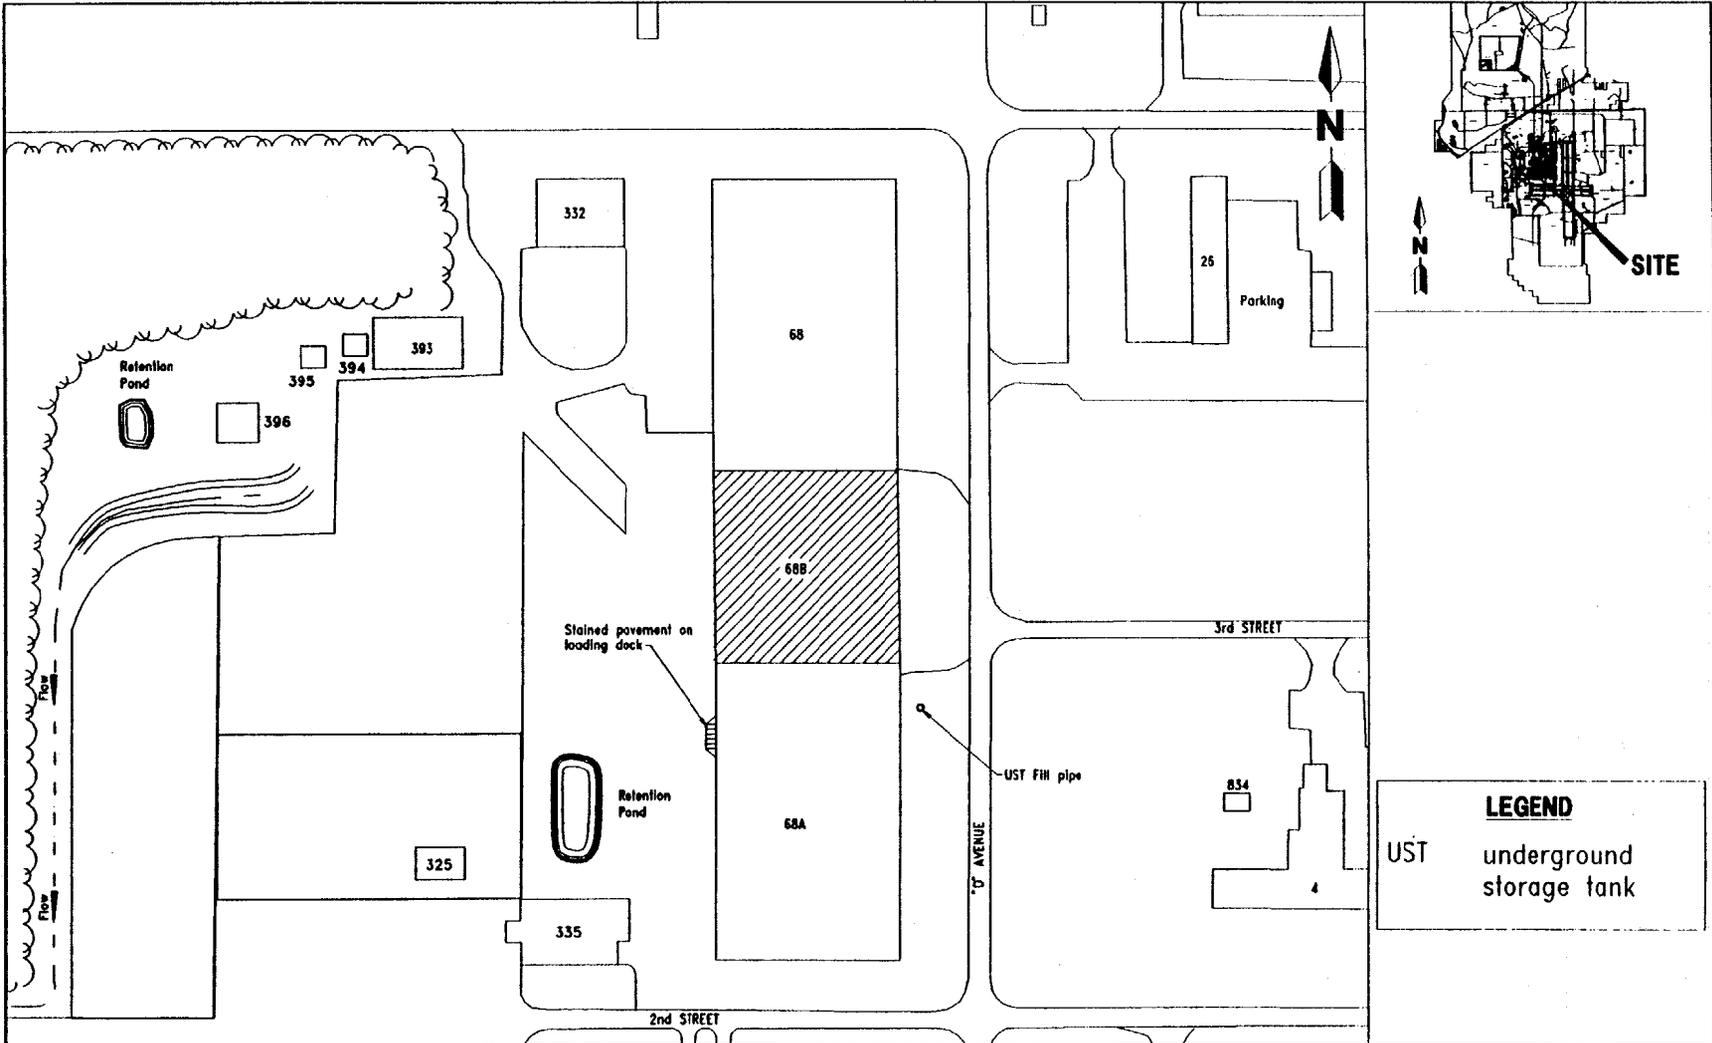

A recommendation that the color code for this facility be redesignated to White is pending a satisfactory resolution of ACM issues.
