Revision 0.0

**Sampling and Analysis Outline Addendum
Base Realignment and Closure
Facility 302LN**

This addendum to the Sampling and Analysis Outline (SAO) for Facility 302LN documents the rationale and the decision to reclassify the facility from 7/Grey to 1/White. The environmental status of Facility 302LN and surrounding facilities was reviewed during the Base Realignment and Closure (BRAC) Cleanup Team meeting on December 16, 1998.

Facility 302LN is a portable skid-mounted structure and can be relocated as necessary. The facility is presently located on a paved area, and there is no contact between the facility and soil or groundwater. No environmental concerns have been identified for Facility 302LN. Potential environmental concerns associated with permanent structures in the area (Facilities 880 and 82) do not impact Facility 302LN.

Based on the information contained in the EBS report, the Sampling Analysis Outline, and the evaluation presented above, the Naval Air Station Cecil Field BRAC Cleanup Team concurred with the recommendation to revise the color code for Facility 302LN from grey to white.
