Revision 0.0

**Sampling and Analysis Outline Addendum
Base Realignment and Closure
Facility 68B**

This addendum to the Sampling and Analysis Outline (SAO) for Facility 68B documents the rationale and the decision to reclassify the facility from 7/Grey to 1/White. The environmental status of Facility 68B was reviewed during the Base Realignment and Closure (BRAC) Cleanup Team meeting on December 16, 1998.

Facility 68B is an office building located on the southwestern corner of the intersection of 3rd Street and D Avenue. The facility is used as offices and non-hazardous material storage. The Environmental Baseline Survey Report incorrectly identified Facility 68B as having friable asbestos containing material (ABB-ES, 1994). Based on the specific usage of this facility, there are no indications of releases from this building.

Based on the information contained in the EBS report, the Sampling Analysis Outline, and the evaluation presented above, the Naval Air Station Cecil Field BRAC Cleanup Team concurred with the recommendation to revise the color code for Facility 68B from grey to white.
