RE: Technical Memorandum for No Further Action,
Potential Source of Contamination 43, Building 617,
Naval Air Station Cecil Field, Florida.

Dear Mr. Davidson:

I have completed the technical review of the Technical Memorandum, dated August 2000 (received September 5, 2000) submitted for the above-referenced building. Based on the results of the PAH-contaminated soil excavation, FDEP concurs with the recommendation of no further action.

FDEP's concurrence is predicated on the information provided by the SOUTHNAVFACENGCOM. Therefore, any new information contradicting the basis for this concurrence, may require further investigation or remedial actions.

If you have any concerns regarding this letter, please contact me at (850) 921-9991.

Sincerely,

Michael J. Deliz, P.G.
Remedial Project Manager
