RE: Technical Memorandum for No Further Action, Potential Source
of Contamination 43 (PSC 43), Building 617, Naval Air
Station Cecil Field, Florida.

Dear Mr. Davidson:

I have completed my review of the Technical Memorandum for No Further Action, PSC 43, Building 617, Naval Air Station Cecil Field, dated February 2001. The report documents that PAH-contaminated soil was removed so as to be protective of human health and the environment. The Department concurs with the recommendation of No Further Action at this site. Please note that Mike Deliz, P.G., originally approved No Further Action at this site on September 12, 2000. This approval is consistent with his and takes into account some minor corrections made to the document.

If you have any concerns regarding this letter, please contact me at (850) 488-3693.

Sincerely,

David P. Grabka
Remedial Project Manager
