Subject: Action Memorandum for Potential Source of Contamination (PSC) 25 - Former Transformer Storage Yard (Buildings 101 and 247), Naval Air Station Cecil Field, Jacksonville, Florida (revision 1)

Dear Mr. Davidson:

The U.S. Environmental Protection Agency (EPA) has reviewed the subject document dated April 3, 2001, and find it adequate for its intended purpose. This action memorandum was originally concurred upon by EPA in September 2000, however, due to comments provided by the State of Florida it was revised. EPA concurs with the revisions.

This action will remove contaminated soils above the residential levels and will therefore not require any institutional controls for surface soils, but institutional controls will still be required for the groundwater contamination until clean-up goals are met.

EPA appreciates the opportunity to work with the Cecil Field BRAC Cleanup Team on this project. If you have any questions regarding this letter please contact me 404/562-8539.

Sincerely,

Deborah A. Vaughn-Wright
