RE: Final Proposed Plan for Operable Unit 10, Site 21, Naval Air Station Cecil Field, Florida.

Dear Mr. Davidson:

I have completed my review of the Final Proposed Plan for Operable Unit 10, Site 21, Naval Air Station Cecil Field, dated July 2005 (received July 8, 2005), prepared and submitted by Tetra Tech NUS, Inc. The Proposed Plan adequately describes the selected remedy of groundwater monitoring and land use controls prohibiting residential use, preventing exposure to or consumption of groundwater and maintaining the integrity of the groundwater monitoring wells. The document is suitable for its intent and the Department has no comments to make on it. Please note that the Department's official acceptance of a selected remedy for Site 21 will be conveyed in a letter approving the Record of Decision for Site 21 signed by the Department's Director of the Division of Waste Management.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,  
  
David P. Grabka, P.G.  
Remedial Project Manager
