Dear Mr. Ugolini,

I have reviewed the Sampling Plan – Tank G82 Natural Attenuation, Naval Air Station Cecil Field, dated November 2, 2001 (received by e-mail November 2, 2001). The Sampling Plan is consistent with what has been proposed in discussions I have had with Tetra Tech NUS, Inc. and yourself. The Sampling Plan adequately describes the work to be done to evaluate natural attenuation at the site as well as the evaluation of other remedial technologies that was requested by myself.

This electronic message is being sent in lieu of regular mail. If you have any questions concerning this review, please contact me at (850)921-9991.

Sincerely,

David P. Grabka
