Subject: NAS Cecil Field, Jacksonville, FL. FL5170022474

Dear Mr. Davidson:

The United States Environmental Protection Agency has received and reviewed the Draft Sampling and Analysis Plan for Munitions Response Program MEC Supplemental Remedial Investigation at Operable Unit 5, Site 15-Blue 10 Ordnance Disposal Area dated January 2011. The document is well written and follows the UFP QAPP format. EPA does have a few minor comments which follow:

1. Worksheet #3 – for all documents EPA requests a hard copy for the draft. However, any draft final and final versions may be electronic.
2. Worksheet #7 – Please list Art Sanford's employer. I thought he worked for a Navy contractor.
3. Worksheet #9 – Under Consensus Decisions, NOSSA will review the ESS document. EPA understand that this is an internal document but we would like to be kept informed of any issues raised by NOSSA.
4. Worksheet #10 – EPA understands that no soil sampling is planned for this effort at this time. However, as was discussed during the February BCT meeting, there could be situations where a soil sample would be needed after MEC removal. Please explain under what situations soil sampling may be needed.

Please contact me at 404-562-8530 or at Vaughn-wright.debbie@epa.gov if you have any questions.

Sincerely,

Deborah A.

Vaughn-Wright
