South Charleston, South Carolina 29411-0068

RE: CECIL FIELD SITE 5

EPA has reviewed the Focused Feasibility Study for Site 5 at NAS Cecil Field. The document is acceptable as written. However the Region offer two comments. These comments need to be addressed in all future documents.

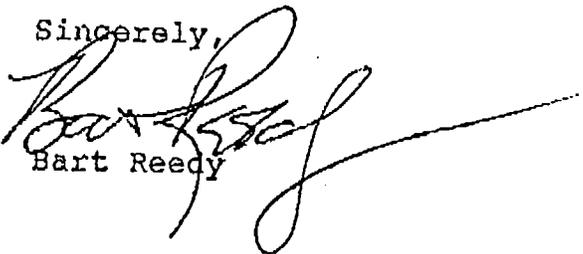

1. Surface soil sample taken for risk assessment purposes, or sample that will serve dual purposes including risk assessment should be taken from the interval of 0ft - 1ft.

2. Comparison of background samples to average on site concentrations is not in agreement with Region 4 guidance.

These comments have been provided to the Navy on previous documents of similar nature.

Should you have any questions please contact me at the letterhead address or by phone at 404-347-3555 vmx 2049.

Sincerely,

Bart Reedy
