Subject: Re: Cecil Field _ Site 21 technical Memorandum _ electronic submission

Everyone:

I have reviewed the draft Tech. Memo. For Site 21, OU 10 and have a few comments.
Page 1-1, 4th paragraph: Please add to what level the soils were removed. Industrial or residential.
Page 1-1, 5th paragraph: Last sentence is misleading. If the soils were removed to industrial levels, why are there LUCs in place for industrial? Suggested rewording - The LUC RD identified industrial reuse for Site 21; and prohibits residential use and any use of the groundwater.

The conclusions and recommendations reflects what was discussed during our last BCT meeting.

Please contact me if you have any questions.

Thanks,

Deborah Vaughn-Wright
