Reference: CLEAN Contract No. N62467-94-D-0888
Contract Task Order 0078

Subject: Transmittal of Final Remedial Investigation
Report for Sites 36 and 37 (Operable Unit 9)
Naval Air Station Cecil Field, Jacksonville, Florida

Dear Mr. Davidson:

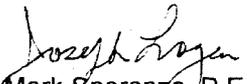

Enclosed please find one copy of the subject deliverable. Only a full copy of Volume I of III, which contains the text, tables and figures, is provided. The two volumes of Appendices that were provided with the draft report are to be retained as final after adding the attached supplements to various appendices. Additional full copies of the appendices can be provided, if needed. Copies of this document have been sent to the NAS Cecil Field Partnering Team as noted below.

This final addresses comments given at the June 1999 NAS Cecil Field BCT meeting and comments given in USEPA's letter of July 7, 1999.

The comments in the USEPA comment letter were addressed by either responding to the comment directly in the text of the report, or discussing the comment with USEPA personnel directly. These discussions were with either Deborah Vaughn-Wright or Ted Simon, depending on the subject of the comment. In most cases, the comments were addressed by revising or expanding the text for clarification. However, there were some comments that were not addressed in the text, and responses to these comments are provided in Attachment A. A copy of the EPA letter is also attached.

If you have any questions, please contact Mark Speranza at 412-921-8916 or Joe Logan at 412-921-7231.

Very truly yours,

Mark Speranza, P.E. *For Mark Speranza*
