Dear Mr. Magwood:

I have completed my review of Draft Dig and Haul Package, Former Day Tank 1 Retention Pond, Naval Air Station Cecil Field, dated June 8, 2004 (received June 9, 2004), prepared and submitted by Tetra Tech NUS, Inc. I have the following comments on the Dig and Haul Package:

- (1) Please add a spreadsheet with the OVA data collected at each soil sampling location.
- (2) Please provide the rationale and calculations for determining OVA concentrations that correlate or that indicate soil contamination greater than residential or leachability soil cleanup target levels.
- (3) Please provide the rationale for why one area is to be excavated three feet below the base of the retention pond and the other area is to be excavated to one foot below the water table.

This electronic message is being sent in lieu of regular mail. If you have any questions concerning this review, please contact me at (850)245-8997.

Sincerely,
