North Charleston, South Carolina 29419-9010

Subject: CTO No. 0157, Well Repairs at Charleston Naval Complex  
**Project Status- Draft Well Maintenance and Inventory GIS Project**

Reference: Contract N62467-89-D-0318 (CLEAN II)

Dear Mr. Harrell:

As we discussed, there are a few tasks that are yet to be completed as part of the well maintenance project at the CNC. These are outlined below. Based on my conversations with CH2M-Jones, they have completed a review of approximately 20% of the wells and have been satisfied with the condition of these wells. EnSafe is scheduled to complete the tasks listed below by July 27, 2001 and submit a revised project database and Arcview project at this time.

Remaining Task:

- Verification of well tag placement at 39 locations
- Photographic documentation of completed repairs at 23 locations

Based on the completion of these task and submittal of the final Arcview project database, the well maintenance program should be ready to transfer to CH2M-Jones. If you have any questions, please contact me at 884-0029. EnSafe appreciates the opportunity to provide the Navy with assistance in these matters.

Sincerely,  
EnSafe Inc.

Steven J. Parker, CPG, CHMM  
Task Order Manager
