North Charleston, SC 29405

RE: Approval of NFA for SWMU 188
RFI Report Addendum (Revision 1) – SWMU 188, Zone E
Charleston Naval Complex (CNC)
SC0 170 022 560

Dear Ms. Daniell:

The Corrective Action Engineering and the Hydrogeology Sections of the South Carolina Department of Health and Environmental Control (Department) have completed the review of the above referenced document, which was received on September 3, 2002. This review was based upon applicable State and Federal Regulations, and the CNC Hazardous Waste Permit, effective May 22, 2002. The Department has determined that all comments have been adequately addressed.

Therefore, the Department hereby grants a No Further Action (NFA) determination for SWMU 188. Please be advised that this determination is based upon currently available data. Additional investigation may be necessary in the future should information become available warranting such action. Also, though SWMU 188 does not require any specific Land Use Controls (LUCs) the Department understands that LUCs will be applied over the entire Zone E to prevent residential reuse of the property.

If you have any questions or concerns, please contact Jerry Stamps at (803) 896-4285.

Sincerely,

David Scaturo, P.E., P.G., Manager
Corrective Action Engineering Section
Division of Waste Management
Bureau of Land and Waste Management
