SEP 10 2013

Re: **No Further Action**
Building 1279, Charleston Naval Base, Charleston, SC
UST Permit # 15368
Release Reported September 17, 1992
Monitoring Reports Received February 6, 2013 and August 26, 2013
Charleston County

Dear Mr. Sanford:

The Underground Storage Tank (UST) Management Division of the South Carolina Department of Health and Environmental Control (Agency) has reviewed the referenced reports.

As concentrations of chemicals of concern are below established risk based screening levels, the reported release does not present a significant threat to human health or the environment. Therefore, no further action will be required at this time. However, if any contamination becomes evident which could be attributed to this UST system, this office may, under authority established in the South Carolina UST Control Regulations R.61-92 Part 280.52/280.73, require site rehabilitation activities.

The decision for requiring no further assessment pertains only to the UST release from the former UST reported in September 1992 and is based solely on the information provided in the referenced reports. Please note, while no further action is required for the referenced UST release, Building 1279 lies within the Land Use Control Zone at Charleston Naval Complex.

The Agency intends to report this closure to the United States Environmental Protection Agency. If for any reason you disagree with this decision not to require any further environmental rehabilitation activities, please contact me in writing within thirty (30) days of the date of this letter.

The monitoring wells at the facility may be permanently abandoned in accordance with the S.C. Well Standards and Regulations, R.61-71 by a certified well driller licensed in South Carolina. Should you choose to abandon the monitoring wells, please submit a monitoring well abandonment report to the Agency on or before January 31, 2014. If you intend to keep the wells for further monitoring, please notify the Agency.

Mr. Sanford
