Re: Request for Approval Permits for Direct Push Technology (DPT) Shallow Groundwater Sampling at the Hobson Fuel Farm, Charleston Naval Complex (CNC), Charleston, South Carolina

Dear Mr. Bristol:

EnSafe is requesting approval permits for the installation of 24 shallow groundwater DPT sampling points at the Hobson Fuel Farm at the CNC, Charleston, South Carolina. A site map presenting approximate sampling locations is attached.

The sampling points should be advanced no deeper than 15 feet below ground surface using standard DPT sampling techniques. Temporary wells will be constructed within the DPT boreholes. Once sampling is complete, the temporary wells will be properly abandoned.

EnSafe wishes to begin groundwater DPT sampling at this site during the week of 25 September 2000, contingent upon your approval.

This effort will be performed in accordance with Section 6.0 of Revision No. 01 of the *Final Comprehensive Sampling and Analysis Plan (CSAP)* and in compliance with South Carolina Well Standards Well Standards and Regulations R. 61-71.

Sincerely,
ENSAFE INC.

By: Craig R. Smith
